- 3 years experience:**
- 2022 - Intern - daadscholarship - 9 months,
 - 2023 - junior developer in ЮнитиApps - 1 year,
 - 2024 - middle in BroadApps 10 months,
 - 2025 - middle в Growire Solutions, til now

Responsibilities Full-cycle iOS application development, from Figma and backend (Swagger/Postman), to comprehensive feature development including MapKit, Camera, Bluetooth, Audio/Video, Lottie, and data persistence with CoreData/SwiftData, integrating network (URLSession/Alamofire, WebSocket), using Firebase for authentication, implementing in-app purchases via StoreKit/RevenueCat, and incorporating analytics with AppsFlyer and Firebase. The process is completed with multi-platform testing for iOS/iPadOS/watchOS and final deployment to the App Store.

Programming languages Swift - main,
Objective-C,
Python

UI frameworks SwiftUI - main, UIKit, SpriteKit

Skills SwiftUI, Structured Concurrency, URLSession, Memory management, Alamofire, Moja, SDWebImage, localization, MapKit, Firebase, Combine, GCD, REST, Lottie, File Manager, Push Notifications, WebSocket, AppsFlyer, Adapty, AppHud, SwiftData, CoreData, Apple Watch apps and widgets, AppStore publication.

- Achievements**
- Published 20+ commercial applications on App Store
 - Launched personal apps with 2,000+ downloads
 - Authored "Swift? - No Problem!" (2024) - comprehensive guide to Swift & SwiftUI
 - Manage development-focused content channels
 - Fluent in English 🇬🇧🇺🇸
